UNITED STATES SENATE**

SUBMITTED BY

**DEPARTMENT OF INTERIOR
BUREAU OF INDIAN AFFAIRS
OFFICE OF TRUST SERVICES
DIVISION OF FORESTRY AND WILDLAND FIRE MANAGEMENT
WASHINGTON, D.C.**

APRIL 2015

**Indian Forestry Status Report to Congress
Bureau of Indian Affairs, Office of Trust Services
Division of Forestry and Wildland Fire Management**

Fiscal Year 2014

Purpose

Public Law 101-630, Title III, 104 Stat. 4532, titled the “National Indian Forest Resources Management Act” of 1990, requires the Secretary of the Interior to submit an annual Indian Forestry Status Report to Congress. Section 312 (c) of this Act reads as follows:

STATUS REPORT TO CONGRESS- The Secretary shall submit, within 1 year of the first full fiscal year after the date of enactment of this title and within 6 months of the end of each succeeding fiscal year, a report to Committee on Interior and Insular Affairs of the United States House of Representatives, the Select Committee on Indian Affairs of the United States Senate, and to the affected Indian tribes a report on the status of Indian forest lands with respect to standards, goals and objectives set forth in approved forest management plans for each Indian tribe with Indian forest lands. The report shall identify the amount of Indian forest land in need of forestation or other silviculture treatment and the quantity of timber available for sale, offered for sale, and sold for each Indian tribe.

This Report is being prepared and submitted by the Bureau of Indian Affairs (BIA), the primary federal agency responsible for fiduciary trust oversight of forest management activities on Indian forest lands.

The BIA Forestry Mission

The mission of the Bureau of Indian Affairs, Office of Trust Services, Division of Forestry and Wildland Fire Management is to provide specialized budget and policy oversight and technical expertise in forest and wildland fire management to Native American Indian Tribes and Alaska Natives. In cooperation with 309 tribes with forest resources, over 18 million acres of tribal trust forestland is managed actively for a variety of purposes. These forests provide an essential source of revenue and jobs for tribes, and play an important role in sustaining tribal cultures and traditions. Management activities within forestlands are governed by forest management plans which outline ecologically and biologically sustainable practices commensurate with tribal goals and objectives. These practices, goals, and objectives may include timber sales and follow up treatments such as timber stand improvement (thinning), and reforestation which are both addressed in this report.

The BIA is committed to helping Tribes manage forests for sustainable yield of forest products and the maintenance of forest health. Our interdisciplinary approach to forest resource management includes partnerships with tribal forestry and fire programs, federal

and state land management agencies, the Intertribal Timber Council, and academia. Tribes are actively working with cooperators such as the U.S. Forest Service and the Bureau of Land Management through the Tribal Forest Protection Act which creates opportunities for larger cross-jurisdictional treatments. The BIA supports tribal goals to balance the protection of valued landscapes with economic benefit through active forest management.

Fiscal Year 2014 Accomplishments:

- 14,543 acres planted through reforestation
- 23,799 acres thinned
- 751 million board feet of timber available for harvest (allowable annual cut)
- 432 million board feet of timber harvested generating \$61.2 million in tribal stumpage income

Current Challenges

Indian forestry continues to face many complex challenges. Climate change, insect infestations, disease outbreaks, wildfire, and development are all threatening the health of Tribal forests. The decline in timber markets and the loss of forestry staffing and infrastructure nation-wide have impacted the ability to actively manage forest health by creating resilient landscapes through timber sales, timber stand improvement (thinning), and reforestation. Since 2008, timber harvest volume has been approximately half of the planned amount. Timber harvest is vital to the health and resilience of Tribal forests.
